3-Part Series
Comprehensive,
Hands-on, Live Patient Education

DENTAL IMPLANT SUCCESS GUIDE

www.restoratedrivenimplants.com

What to Expect at RDI

Restorative
Driven
Implants

Dear Friends and Colleagues,

Our goal at RDI is to provide a comprehensive educational experience that focuses on the best end-result for the patient.

Incorporating the most-up-to-date research-based knowledge and clinical training, we will equip dentists with the skills and tools they need for successful implant placement and seating the final restoration.

With small student-to-mentor ratios, we provide a personable experience that gives dentists the opportunity to feel comfortable asking questions. At RDI - if you succeed, we all succeed.

Best Regards, RDI Mentors

Hear From **Past Attendees.**

Dr. Shalini Mohan

“In addition to the excellent RDI series content, this program has the benefit of continued mentorship and support. I think this is crucial to dentists that are starting out in their implant journey. I highly recommend, and I have already signed up for the Master Series.”

Dr. Jason Yick

“The hands-on live patient portion was very unique and a life-changing experience. I was able to incorporate what I learned in Series 1 & 2 and apply my knowledge in a clinical setting. This was the most helpful and practical CE I have ever taken, and I look forward to my implant journey. I highly recommend this course to my peers!”

Dr. Morgan Braza

“This program was organized and run extremely well. I really enjoyed and appreciated being able to put our skills to use during the live patient surgeries. Having an instructor observe and teach throughout the surgeries was an amazing experience. Excellent learning environment, Thank You!”

2025 **Course Dates.**

CORE	Spring 2025 Minneapolis	Fall 2025 Minneapolis
SERIES 1	March 7-8	September 12-13
SERIES 2	April 4-5	October 3-4
SERIES 3	April 25-26	November 7-8

Our Mentors: The Difference Makers.

Dr. Jan Bublik

Diplomate of International Congress of Oral Implantology

- Palacky University School of Dentistry and Medicine in the Czech Republic
- Oral Surgery at the University of Rochester
- Practices in Weston, WI

Dr. Kim Kutzler

Member, American Dental Association

- Marquette University School of Dentistry
- Certified in laser dentistry and Invisalign therapy
- Practices in Steven Point, WI

Dr. Wes Mullins

Fellow, Academy of General Dentistry

- West Virginia University School of Dentistry
- Co-founder of "The Dental Guys" Podcast
- Practices in Knoxville, TN

Dr. Kristin Skow

Member, Academy of Osseointegration

- University of Minnesota School of Dentistry
- Oral Facial Myofunctional Therapist
- Practices in Spring Valley, WI

Dr. Adam Kruger

Fellow, International Congress of Oral Implantologists

- University of Iowa School of Dentistry
- Misch Surgical Implant Fellow
- Practices in Oelwein, IA

Dr. Conor Casey

Hanau Excellence in Prosthodontics

- University of Minnesota School of Dentistry
- University of Alabama at Birmingham Prosthodontics
- Practices in Ashland, WI

Dr. Brad Millard

Member, American Academy of Implant Dentistry

- University of Minnesota School of Dentistry
- United States Army Special Operations
- Practices in Ankeny, IA

Dr. Jonathan Bradshaw

Member, American Dental Association

- Louisiana State University School of Dentistry
- 2-year GPR program at University of Tennessee Medical Center
- Practices in Knoxville, TN

Dr. Brad Foss

Member, American Dental Association

- Marquette University School of Dentistry
- Practices in Ripon, WI

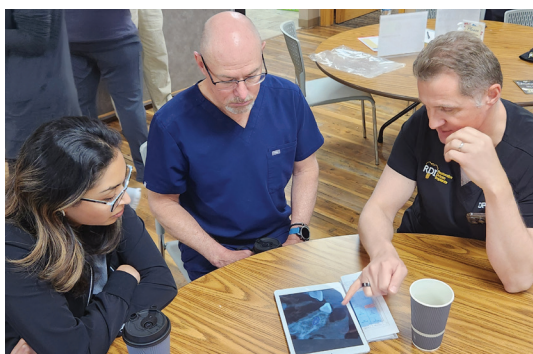

Dr. Alex Flora

Member, American Dental Association

- Marquette University School of Dentistry
- Practices in Woodruff, WI

Humble. Approachable. Enjoyable.

Currently practicing dentists, just like you!

Our RDI mentors are highly trained, approachable, and loaded with credentials. Whether throughout the Core Series during lectures, hands-on, or live-patient surgeries, our mentors are here every step of the way. RDI graduates can also join our ongoing mentor/peer discussions on our Online RDI Mentorship Group. The mentor team is focused on ensuring you and your team are prepared and confident to place dental implants in your practice.

SERIES 1: Surgical Principles & Healed Ridge

LECTURE OBJECTIVES

- Understand surgical principles
- Understand the atraumatic extraction technique, the art of bone preservation
- Understand socket classifications and how to treat them accordingly
- Learn various suturing techniques
- Understand material selection (sutures, membrane types, grafts)
- Comprehend graft containment
- Understand healing dynamics
- Understand maintaining vs. obtaining soft and hard tissue
- Understand principles of dental implantology
- Understand anatomical concerns for case selection
- Comprehend guided vs. non-guided surgery
- Learn surgical and prosthetic parts and pieces
- Learn basic bone healing physiology
- Understand implant placement on healed ridge
- Learn proper incision design and no-flap (punch) procedure
- Learn insertional torque value (ITV)
- Learn the basics of reading CBCT cone beam images
- Comprehend one and two-stage surgery and use of provisional prostheses
- Understand soft tissue challenges
- Maintaining and obtaining high-quality non-mobile tissue around dental implants

HANDS-ON-ACTIVITIES

- Understand tactile perception of different bone types; practice using drills in D1-D4 bone types
- Implant placement into maxillary bone models guided and non-guided (free-hand)
- Suturing techniques on model

ONLINE MODULE

(Completed prior to attending the in-person course)

- The principles of implantology and historical overview of dental implants
- Different implant designs, implant anatomy, and different features of implant body
- Pharmacology in implant dentistry
- Proper CT scan for implant guide
- Step-by step overview to make a surgical guide for dental implant placement

SERIES 1: Surgical Principles & Healed Ridge

CORE	Spring 2025 Minneapolis	Fall 2025 Minneapolis
SERIES 1	March 7-8	September 12-13
SERIES 2	April 4-5	October 3-4
SERIES 3	April 25-26	November 7-8

SERIES 2: Immediate Placement & Restorative

LECTURE OBJECTIVES

- Learn how to treatment plan and execute immediate implants using CBCT technology
- Understand free-hand implant placement in immediate extraction sites
- Learn to preserve bone using an atraumatic extraction technique
- Understand implant placement for denture patients
- Learn about the different extraction socket types and how to graft around the implant
- Understand Implant selection based on socket anatomy
- Learn how to use ISQ technology to aid in immediate extraction implant placement
- Learn how to use custom tissue formers for tissue management and graft containment
- Understand several impression techniques and when to use them (for example, open vs. closed tray technique)
- Understand abutment selection and functional design
- Understand the application of immediate provisionalization
- Understand custom tissue formers (chair-side vs. lab)
- Learn how to create a custom impression coping
- Understand transmucosal abutments and when to use them

HANDS-ON-ACTIVITIES

- Hands-on model training (extractions, grafting, suturing, socket preservation, and more)
- Hands-on model demonstration: open and closed tray impression techniques, temporary abutment and crown fabrication, abutment selection and placement process

ONLINE MODULE

(Completed prior to attending the in-person course)

- Case for immediate implant placement
- Case selection and immediate planning
- Placement protocol and graft containment

SERIES 2: Immediate Placement & Restorative

CORE	Spring 2025 Minneapolis	Fall 2025 Minneapolis
SERIES 1	March 7-8	September 12-13
SERIES 2	April 4-5	October 3-4
SERIES 3	April 25-26	November 7-8

Series 2 Includes: **Team Training Component**

Bring 2 members of your team to attend the team training component.

Lecture and Hands-on to include:

- *Understand operatory set-up, aseptic and sterilization techniques*
- *Understand and experience hands-on activities with implant parts and pieces*
- *Hands-on model work with all the restorative parts and pieces of different types of implant restorations*
- *Understand how to support the doctor*

Donated Dentistry. **Small Classes.** Ongoing Mentorship

Whether you're a general dentist or a specialist, our courses will help you feel confident in bringing implants to your own practice.

Meet Mentor - Dr. Wes Mullins

"The RDI difference is really the small class size and that allows us mentors to provide a one-on-one approach. The mentors are a community of approachable doctors. We've been where you've been, and we know how to create an environment where learning is at a maximum."

RDI Mentorship Group

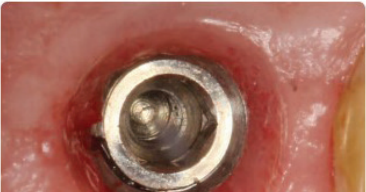

[All Updates](#)[Mentions](#)[Following](#)

Jan Bublik posted an update a day ago

Gang, here is a prime example of well intentioned care with little knowledge. Patient was sent by an RDI graduate who suggested removal and re-implantation. The General Dentist graduate of RDI was absolutely correct in his request and diagnosis of implant failure. Implant was placed by Oral Surgeon and declared "healed and proceed with..."

Our mentorship continues through our online networking group, where mentors and alumni post cases and ask questions in a secure and private environment.

SERIES 3: Live Patient Surgery & Implementation

TWO-DAYS OF HANDS-ON, LIVE PATIENT IMPLANT SURGERIES

Our RDI mentors will guide you as you perfect your implant placement technique, offering personalized, over-the-shoulder training in a 2-to-1 student to mentor ratio environment.

- Review preoperative workup using CBCT for each patient
- Preselected implant patients receive comprehensive treatment throughout the process
- Extractions done atraumatically for bone preservation
- Hands-on implant placement of healed ridge and immediate extraction placement
- Live patient implant uncovering

Access to Additional Implementation Lecture Materials to share with your team

Don't walk alone on your journey: involve everyone on your team.

This is the one of the most important components of the Core Series, as the success of your business relies on the support of your team!

- Learn how to implement Restorative Driven Implant education in your practice
- Learn what you need to do differently as a dentist in your practice on Monday morning
- Learn what should be part of your toolkit to get started with implant placement
- Understand what your team needs to hear and believe to help get your team on the same page
- Learn what codes to use for implant procedures
- Understand how to market to patients

SERIES 3: Live Patient Surgery & Implementation

CORE	Spring 2025 Minneapolis	Fall 2025 Minneapolis
